# **VOLUNTEERING**

#### **ALGORITHM DESIGN LABORATORY | PRESENT**

• My goal is to assist students in solving their lab exercises and support them in understanding the taught concepts.

# **PROJECTS**

#### THE MAZE | GAME WITH INTERFACE

• Language: JAVA

- Custom interfaces are implemented for menu options.
- Each player's account information is stored locally, and the objective is to find the exit of a maze as quickly as possible.

# **ROCK THE SHOP** | University Project - Object-Oriented Programming

- Language: C++
- Application for managing a real store (employees, products, order processing, activity-based reports).
- The application operates via a terminal, and options are selected through keyboard input.

#### LAN PARTY | University Project - Algorithm Design

- Language: C
- The goal is to develop a software solution (an executable program) to automate this process.

#### **SUBWAY** | SHORTEST ROUTE FINDER

- Language: C
- To optimize travel time between two points, the shortest route must be determined.
- A file containing all information about stations and bus connections (e.g., Bucharest) is used to store the map.

# **COMPETITIONS**
