PROJECTS

PERSONAL WEBSITE | Homework for college - Web Techniques
- Languages: HTML, CSS
- Personal website featuring my projects, technical articles and contact information to demonstrate my programming and web development skills.

SIMULATION OF A COMPETITION | Homework for college - Design of Algorithms
- Language: C
- To find out the winning team, it is important to take into account the difficulty of the victories obtained, the number of victories is not enough

LAN PARTY | Homework for college - Design of Algorithms
- Language: C
- The goal is to create a software solution (executable program) that can automate this process.

SUBWAY | The Shortest Route
- Language: C
- In order to make the time to get from one point to another more efficient, it is necessary to look for the shortest way.
- To retain the map, a file is used as input data with all the information regarding the stations and bus connections (e.g. Bucharest).

RANKING | Formatting a Table in Excel
- Language: C
- For good data management and formatting, an excel table is a good choice, this project eases the problem of entering data and formatting the table by the user.
- Creating a ranking based on the points obtained, following a contest.

THE BACCALAUREATE'S EXAMINATION | Digital Skills Certificate
- Language: MySQL
- Creating a database for the management of a baccalaureate exam.
